

Call for Nominations: 2022-23 Max Kleiber Prize

DEADLINE FOR APPLICATIONS: March 3, 2023 by 11:59pm

DESCRIPTION

This prize was established to honor the sixty-year career of Professor Max Kleiber at the University of California, Davis, in recognition of his outstanding success in elucidating metabolic relationships in intact animals. The award is made to a nominee who best represents the characteristics and high standards of scholastics and professional ethics that guided Professor Kleiber's career. The dissertation must involve original work that makes an unusually significant contribution to one or a combination of the areas of biochemistry, nutrition, or physiology.

Selection Criteria

Selection will be based on an abstract of the dissertation prepared by the applicant that clearly describes the hypothesis underlying the study, how it was tested and the physiological significance of the major conclusion(s). The dissertation must involve original work that makes an unusually significant contribution to one or a combination of the areas of biochemistry, nutrition or physiology.

Eligibility

The applicant must have completed all requirements for graduation during the current 2022-23 academic year. **DEADLINE FOR APPLICATIONS: March 3, 2023 by 11:59pm.**
