

Fairfield-Suisun Sewer District

Now Hiring! Intern Opportunity

Paid internship opportunity with a flexible schedule and hybrid work options (15 - 20 hours per week).

If you are enthusiastic about nature-based solutions and climate adaptation strategies this is a great internship opportunity for you!

About The Opportunity

Throughout the internship, you will work on projects and community outreach initiatives to:

- Understand climate vulnerabilities and potential for nature-based solutions to increase community resilience.
- Coordinate creek clean-up events and communicate effectively with community members and stakeholders to collect feedback on projects and programs (e.g., Suisun City Climate and Environment Festival, Kellogg Resiliency Project Community Meetings)
- Establish best practices for the District's use of digital tools for effective story telling (e.g., GIS Story Maps, social media, brand guidance)
- Assist in the oversight of consultants conducting field investigations (e.g., wetland delineations, site surveys, soil sample collection).

Relevant Degrees

- Environmental-Water Resources Engineering
- Climate-Environmental Science
- Landscape Architecture
- Environmental Policy
- City-Urban Planning

About The District

Over several decades, the District has evolved from a technical engineering entity to a valuable resource manager, partner in local economic development, and active member of the watershed community. The District has taken numerous actions to shift traditional thinking about the way wastewater utilities are run.

- We are an award-winning facility, including winner of the Utility of the Future Award in 2016 and 2019.
- We are always looking for innovative solutions and often participate in various research pilots, which offers unique opportunities for our staff.
- We strive to obtain as much energy as possible from waste product and renewable energy through solar power, wind turbines, and cogeneration engines.
