INVOLVEMENT

SWEGS - Invitation to undergrads

Our biggest event of the year, the annual **EWR showcase**, is coming on **April 28th**! In the annual showcase, we feature a keynote presentation, faculty oral presentations, student poster presentations, an industry panel discussion, and networking sessions. As a student, you can present preliminary results from ongoing projects or research as a poster presentation. A poster presenting a project you completed for one of your classes is welcome! The showcase is also a great opportunity for networking and learning about potential job opportunities from industry professionals attending the event.

Student Health and Counseling Services is committed to providing body inclusive care.

Being weighed at an appointment should not be a barrier to you seeking medical care. You can decline being weighed or knowing your weight at your **Student Health and Counseling Services** appointment. Learn more about the decline to weigh initiative and how to combat weight stigma.

Does knowing you can decline being weighed make you more likely to book an appointment? Tell us here: bit.ly/shcsscale

Help save California's oceans + fight student hunger

CALPIRG Students on campus seek students excited to make a difference on key issues affecting our communities. Sign up here to learn more!

As a leader with CALPIRG, you can:

Work with the media and help organize press conferences with experts and elected officials to expand marine protected areas in California from overfishing and save wildlife like whales and dolphins.

Lobby elected officials to increase clean energy and fight climate change.

Increase voting accessibility and voter turnout in elections.

Advocate for free, open textbooks at the UCs. And more!

Fill out an interest form to get involved this Spring!

INTERNSHIPS

R&F Engineering Internship

R&F Engineering Inc is looking to hire for a summer 2023 internship position.

R&F Engineering, Inc. was founded in 2022 by Mike Rossiter, PE, and Chris Fritz, PE, to provide civil engineering services focused on water resources and flood control projects. Mr. Rossiter and Mr. Fritz have a combined 35 years of professional experience and have managed various water resources and flood risk reduction projects for public agencies, including counties, cities, reclamation districts, and flood control agencies. R&F is a small firm in Roseville, CA, strongly emphasizing client satisfaction and personal service.
