# ACADEMICS

---

## CHE 1V Summer Course

**CHE 1V** (Preparation for General Chemistry) is offered this **Summer I and II** with advisors across campus. Importantly, students who want to take General Chemistry (CHE 2/4) in the fall must either earn a qualifying score on the Chemistry Placement Exam or pass CHE 1V. So incoming students who take CHE 1V over the summer can start the General Chemistry sequence on track in the fall.

# HEALTH & WELLNESS

---

The price of OTC [emergency contraception](#) has been reduced to \$25 across campus -- almost a 17% reduction.

This resulted from collaboration among HEP's Sexual Well-Being Team, ASUCD's Student Health & Wellness Committee, SHCS' medical and pharmacy leadership, and UC Davis Stores to gather student feedback and increase access to this important health resource.

**OTC emergency contraception can be found on campus:**  
SHCS Pharmacy (no cost to SHIP students with a prescription)  
Wellness to Go vending machine at The ARC (cash only)  
The Market at The ARC  
The Market at the Memorial Union

## Water Resource Control Engineer (Sacramento Area)

**The State Water Resources Control Board's** (Water Board) Division of Water Rights (Division) Enforcement Section has three (3) vacancies for a Water Resource Control Engineer (WRCE). The positions will be at 1001 I Street, 14th Floor, Sacramento. The position requires the use of teleworking, in-office work, and fieldwork. The positions offer an exciting opportunity to utilize hydrologic data, field data, engineering principles, and interpretation of laws and regulations in application to California's rich history of water rights.
