RESOURCES

MAY is Mental Health Awareness Month!

Aggie Mental Health is putting on several meditation and crafts activities throughout the month, and will be tabling every weekday at the MU and Silo. The first 1,000 Aggies who complete a suicide prevention training online will receive a prize!

NAMI: Young Adults Connection Support Groups

NAMI Support Groups for Young Adults are free, peer-led support groups for anyone between the ages 18 and 29 who has experienced symptoms of a mental health condition. Mental health conditions include anxiety disorder, depression, bipolar disorder, obsessive-compulsive disorder, post-traumatic stress disorder, schizophrenia, or any condition that affects a person's ability to lead a fulfilling life. Participants will learn together how to establish and maintain wellness.

You do not need a formal diagnosis to attend. Anyone who is seeking mental health support may attend.

Connect with a CAN Counselor on campus!

The Community Advising Network (CAN) is comprised of a diverse team of counselors who are here to help students achieve their goals and address factors that may be affecting their academic success.

They support students through informal consultations and/or through therapy. To schedule your first appointment with a CAN counselor, reach out to them directly via email. You can find their contact information here.

CAMPUS JOBS

Greenhouse Gas Inventory Data Analyst

This position works to construct the annual GHG inventory for the campus and our annual nitrogen footprint. While students do not need to be science or engineering majors to do this job, having science literacy and good math skills is important for this position. In the past, civil engineering students often did quite well in the position of students who've had chemistry and liked it. Students must be comfortable working in Excel and have good logic and error recognition skills. Strong organizational/data management skills are also critical.

You can [Apply](#) on Handshake Job **#7719394**

Other jobs and fellowship open in the Sustainability office

Campus Sustainability Data Analyst, Job **#7707713**
Climate Action Fellows (5 positions), Job **#7692641**
Greenhouse Gas Inventory Data Analyst, Job **#7719394**
Outreach Integration Coordinator, Job **#7730529**
Zero Waste Coordinators (2 positions), Job **#7698205**
Green Workplace Coordinator, Job **#6571749**
