Hello Students,

We hope you are enjoying your spring break. Please see the announcements below:

1. Civil Engineering Position with Summit Engineering, Inc. (Please see attached)
2. 2019 Summer Program with National Chung Hsing University: Deadline April 18 (Please see attached)
3. UC Davis Summer Abroad Program in Scotland, complete ARE 112: Deadline April 5
4. Engineering Internship with Yuba City: Deadline April 8

1. Civil Engineering Position with Summit Engineering, Inc. (Please see attached)

Hello,

My company is looking for UC Davis new grads to fill structural, civil, and water/wastewater engineering positions. I was wondering if you could please announce the jobs available in your weekly department emails to the students.

We are located in Santa Rosa, California, approximately one hour north of San Francisco. Our firm has about 35 people and we do many projects all over the north bay area. As we are in wine country, many of our clients are wineries. We are a multi-discipline firm with civil, electrical, structural, and water/wastewater divisions.

Attached is information about an entry level civil engineering position. We are encouraging students looking for full time positions to apply! To apply, send your resume and cover letter to recruiting@summit-sr.com. For more information visit our website at www.summit-sr.com. The job postings are also on Aggie Job Link.

We will also be at the Career Fair on April 17th, followed by an evening information session (more information about timing and location to come)

I am really excited we are looking for UC Davis students! I know Davis students have some great talent and Summit is a great company to provide personal and professional growth.

I look forward to hearing from you! Let me know if you need me to provide any more information.

Thank you,
2. 2019 Summer Program with National Chung Hsing University (Please see attached)

The UC Davis College of Engineering has partnered with National Chung Hsing University (NCHU) in Taiwan to offer a two-week study opportunity in Summer 2019. Two (2) students will be selected to spend July 31 - August 14, 2019 studying and living in Taiwan.

Accommodations, food expenses, tuition, and transportation during your stay will be provided by the host campus. However, students who are selected must arrange their own air transportation both to and from Taiwan.

IF YOU ARE INTERESTED:

1. Please carefully read the attached program information provided by the host campus.

2. Completely fill out the attached application.

3. Submit your completed application materials in 1050 Kemper Hall by noon (12:00PM) on Thursday, April 18, 2019.

4. All applicants will be notified via email before April 30 if you have been selected.

PLEASE NOTE: A personal statement, letters of recommendation, and transcripts ARE NOT REQUIRED. The attached application is the ONLY item you must submit if you would like to apply. No other information is required.

The following information is provided by NCHU:

The main objective of the summer program is to enhance the education collaboration and student exchange between our sister universities. Last year’s program gathered 33 international students from the University of Delaware, USA, University of California Davis, USA, University of Massachusetts--Lowell, USA, University of Washington, USA, Wayne State University, USA, Institute of Chemical Technology Prague, Czech Republic, Czech Technical University, Czech Republic, Ecole Polytechnique of the University of Orléans, France, Wroclaw University of Science and Technology, Poland, Toyota Technological Institute, Japan, Tohoku University, Japan, Nanzan University, Japan, Hokkaido University, Japan, Kasetsart University, Thailand, Chiang Mai University, Thailand, Nong Lam University, Universiti Tenaga Nasional,
Malaysia and University of Macau. The program included Chinese culture courses as well as special lectures in the fields of engineering. Students were able to explore the state-of-the-art engineering technologies developing in Taiwan as well as experience the beauty of this “treasure island”. During the two weeks, students also joined different directed study programs in the selected research groups from the college. The outcomes of the directed study were presented in the end of the summer program.

Participants will directly join the independent study program in one of the selected research groups from Civil Engineering, Mechanical Engineering, Environmental Engineering, Electrical Engineering, Chemical Engineering, Materials Engineering, Precision Engineering, Communication Engineering, Optoelectronic Engineering and Biomedical Engineering. For every student, College of Engineering will provide accommodations, food expenses, and tuition. Information and detailed curriculum of the summer program can be found in the enclosed leaflet.

3. UC Davis Summer Abroad Program in Scotland, complete ARE 112: Deadline April 5

UC Davis Summer Abroad is accepting enrollments for Perspectives in Global Management, a program to Edinburgh, Scotland led by UC Davis professor Jerry Lundblad. Students on this 4-week program earn units for Agricultural and Resource Economics (ARE) 112 and 198 (8 units total).

Program Highlights

Covers the principles of planning and decision making; individual behavior, motivation, leadership; groups; conflict and change.

Special emphasis on supply chain management that has global implications for success.

Site visits within Edinburgh, Glasgow and London to see career options.

Study the importance of leadership and culture in an organization.

Guest speakers from consulting firms and industry will provide insight to global management.

Benefits of Taking ARE 112 Abroad

Small class size – limited to 30 students

Learn material from a global perspective, a sought after employment skill

Take your learning outside the classroom through site visits related to the course

Develop your leadership skills through travel and new experiences
Build your resume with an international academic experience

**Enrollment is OPEN!**
Enrollments are accepted on a first-completed, first-reserved basis during the enrollment period: January 9 – April 5. Visit the program webpage links below for details on class syllabi, excursions, fees, and more.

- Draft syllabus & itinerary for 2019
- Check out the On Site page for details about housing and excursions
- Fees posted online *(summer financial aid applies!)*
- Financial Aid & Funding Information

- We hope you’ll join us abroad!

4. **Engineering Internship with Yuba City: Deadline April 8**

The City of Yuba City is now accepting applications for **Engineering Intern**.

This is a part-time, temporary position within the Public Works - Engineering Department. Under general supervision, an Engineering Intern provides assistance with field and office civil engineering work in the planning, professional design and construction of City facilities and infrastructure including: sewer, water, storm drains, street improvements and traffic signals. Interns have the opportunity to contribute to active projects and gain real world experience in a professional and friendly work environment. This is a great opportunity for an Engineering student or recent graduate looking for (paid) on-the-job experience. This position does not include benefits.

This recruitment will close on **Monday, April 8, 2019 at 12:00PM**. For all the details and to apply, please visit:

Do you know any qualified candidates that would be a good addition to the Yuba City family? Please share this with them!

Have a great day!
Thank you,
